# Introducing: Sound improving updates for Raidho C-series speakers

$$L_p = 10 \log_{10} \left( \frac{p^2}{p_{\text{ref}}^2} \right) = 20 \log_{10} \left( \frac{p}{p_{\text{ref}}} \right) \text{ dB}$$

**Yes Einstein,  
we know!**

## Sense the sound

At Raidho Acoustics we believe that Hi-fi sound is more than fulfilling requirements of electronic measure devises. The sound from a very (very) good loudspeaker must first of all fulfil the requirements of our most unique and delicate measuring tools - hearing and the human brain. During the time we developed the Raidho C4, we made improvements in the unit, tweeter, crossover and not least we upgraded the wiring inside the speaker cabinet with second-to-none Nordost Odin and Valhalla cables. We have transferred these experiences and improvements into the new updated C-series. All in all improvements that theoretically exceeds the capacity of the ear and brain - but somehow you sense and feel a big difference.

## Evolutionary, Revolutionary - unique!

Naturally we think that Raidho C-series sounds fantastic as it is, and the design and finish are still beautiful. It is in the "engine room" we have changed the design of the units, changes that have brought a wider span to the units capability to reproduce the sound. A careful attention to details has resulted in a faster unit adding more details to the sound micro dynamics - the unit simply responds quicker, adding more details to the sounds coming out of the units. Of course there's more to it than that, but this is the most significant change, and the amazing update that we believe to revolutionize the concept of Hi-fi.

*"Overall you feel more present with the sound, it hits you in a quite new and much more pleasant way"*

A look inside,  
3D rendering  
of the new  
speaker unit.

## Enhanced micro dynamics

### Raidho C 1.0 > C 1.1

C1.0 is perhaps our most impressive loudspeaker because of its small size.

The C1.0 has been equipped with the new designs and experiences gained from the Raidho C4.0 and updated to C1.1

### Raidho C 2.0 > C 2.1

The Raidho C2.0 loudspeaker is a harmonious experience, well balanced impression comparing size and sound.

The C2.0 has been equipped with the new designs and experiences gained from the Raidho C4.0 and updated to C2.1

### Raidho C 3.0 > C 3.1

The C3.0 loudspeaker from Raidho moves sound as well as design to a very high level of Hi-fi.

The C3.0 has been equipped with the new designs and experiences gained from the Raidho C4.0 and updated to C3.1

## Hearing is believing

In this update we have made new and revolutionary changes in the way a loudspeaker is built. We try to go new ways in reaching the ultimate sound experience and even though you will be amazed of the improvements made, we're still not there, but this update takes us a step or two in the right direction. So, give the Raidho speakers a go with measuring its performance - or even better, take your time, let your pulse at ease, put your favourite music on an let your mind explore the music you really love, you will be amazed and convinced!
